Guest Editors

Mehdi Mahmoodi-k holds a PhD in mechanical engineering from the Iran University of Science and Technology (IUST), which he obtained in 2016. He has published over 50 research papers on environmental and energy-related issues in transportation systems. His research interests include green energy, automotive engineering, and transportation systems. Dr. Mehdi is currently working on several research projects, including investigations into green transportation and industries, low-temperature batteries for improved energy efficiency and environmental protection, transport control systems for environmental conservation and fossil fuel economy, and advancements in smart technology and energy harvesting processes in the automotive industry. Email: m_mahmoodi_k@iust.ac.ir

Charles S. Ragusa, born in 1970, is an Assistant Professor in the Department of Environmental Management at Tarrant County College (TCC) in Fort Worth, Texas, USA, since 2015. His research interests include the environmental and ecological impacts of agriculture, ecological economics and heterodox approaches to complex problems, technology management and sustainable development, and environmental innovations in economy and technology. Dr. Ragusa has made over 400 scholarly contributions, including nearly 200 peer-reviewed research papers with more than 2,000 citations. He currently supervises PhD and Master's theses on global environmental and economic management issues. Email: ca.s.ragusa@gmail.com
