# CONCEPTUAL BASES FOR CREATING FREE ECONOMIC ZONES IN UZBEKISTAN Dilmonov K. B.

Senior Lecturer of the Department "Tourism and Hotel Management" of the Bukhara State University, Independent Researcher of the 3rd Year of the Bukhara State University

## ANNOTATION

The article analyzes free economic zones, their essence, the legal basis for their organization, specific ways to create free economic zones in the region.

**Keywords:** free economic zone, tourist zone, free industrial zones, free scientific and technical zones, small industrial zones, SEZ, tourism opportunities, technology parks, regional innovation centers-technopolises.

## INTRODUCTION

In accordance with the Law of the Republic of Uzbekistan "On Free Economic Zones", this is a specially allocated territory with administrative boundaries and a separate legal order. Legal entities and citizens (individuals) are allowed to engage in any economic, financial and other activities on the territory of the free economic zone, with the exception of activities prohibited by the legislation of the Republic of Uzbekistan. Legislation on free economic zones consists of this Law and other legislative acts.

# ANALYSIS OF LITERATURE ON THE TOPIC

Textbooks, manuals, other textbooks on the rights of free economic zones, free economic zones of such scientists as D. Yu. Khodzhamkulov, M. Kamalov, M. Kurbanov on this topic and those who wrote scientific brochures. However, these works provide general information about free economic zones, but do not fully reflect data based on the activities of a particular region.

### **RESEARCH METHODOLOGY**

In the course of the study, methods such as comparison, trend analysis, horizontal analysis, vertical analysis, comparative analysis, SWOT analysis were used.

# ANALYSIS AND RESULTS

The free economic zone is created by the decree of the President of the Republic of Uzbekistan. The status of the free economic zone, as well as the timing of its creation, will be determined by the decision to create this zone.

Free production zones include export-oriented production zones, agro-towns, business zones, industrial and economic zones and other zones.

Free scientific and technical zones consist of separate zones where scientific, production and educational centers are concentrated, and a special legal procedure for the development of scientific and production capabilities is established for them.

Free scientific and technical zones are organized in the form of high-tech zones, technology parks, regional innovation centers - technopolises.

The free economic zone will be developed in accordance with the program approved by the Cabinet of Ministers of the Republic of Uzbekistan.

Table-1. Description of free tourist zones planned to be created in Uzbekistan

A number of events are being held in this area in Uzbekistan. Today there are 14 free economic zones in the country, some of which are more active. In particular, 62 projects worth \$486 million have been implemented in the Navoi, Angren, Jizzakh, Urgut, Gijduvan, Kokand and Khazarasp free economic zones. More than 4,600 jobs have been created.

To date, 1,021 projects worth 535 billion soums have been implemented in these zones, more than 9,600 jobs have been created. The projects produce products of light, chemical, food, electrical industries, modern building materials, furniture and other finished products that are in demand not only in the domestic but also in foreign markets. In addition, in the future it is planned to create 11 thousand new jobs as a result of the implementation of 248 projects.

It is impossible to effectively use the economic potential of the regions by financing the socioeconomic development of the regions only through financing from the state budget or bank loans. In this regard, increasing the social responsibility of the private sector, the implementation of projects based on public-private partnership (partnership) also play an important role in the implementation of strategic objectives. Using these opportunities, a number of projects worth about \$2.2 billion are being implemented in the regions in such areas as energy, housing and communal services, healthcare, water, education, ecology and environmental protection.

In the process of analyzing the situation with free economic zones in the same region, we made several comments on this matter. If we consider the situation in the Bukhara region, then according to the data for 2021, there are 2 FEZ "Gijduvan" and FEZ "Bukhara-Agro" in the region. Below is an analysis of the benefits provided by the government to these SEZs.

### CONCLUSIONS AND RECOMMENDATIONS

In addition to the FTA in the region, it is expedient to create free tourist zones (FTZ).

Measures are being taken to effectively use the country's tourism potential, popularize the national cultural heritage among the national and international community, develop pilgrimage tourism, ecological tourism, gastronomic tourism and their infrastructure. The allocations for the regional tourism infrastructure development program for 2021 are as follows.
