INNOVATION IN THE MODERN EDUCATION SYSTEM: a collection scientific works of the International scientific conference (25th April, 2022) – Washington, USA: "CESS", 2022. Part 17 – 543 p.

Editorial board:

Martha Merrill, PhD Kent State University, USA

David Pearce, ScD Washington, D.C., USA

Emma Sabzalieva, PhD Toronto, Canada

Nikadambayeva Hilola Batirovna, Candidate of Pedagogical Sciences,
docent

Pirimov Akram Pirimovich, docent

Shodiyev Furqat Davranovich, Candidate of Technical Sciences, docent

Languages of publication: русский, english, казахша, o'zbek, limba română,
кыргыз тили, Հայերեն

The collection consists of scientific research of scientists, graduate students and students who took part in the International Scientific online conference "**INNOVATION IN THE MODERN EDUCATION SYSTEM**". Which took place in Washington on APRIL 25, 2022.

Conference proceedings are recommended for scientists and teachers in higher education establishments. They can be used in education, including the process of post - graduate teaching, preparation for obtain bachelors' and masters' degrees. The review of all articles was accomplished by experts, materials are according to authors copyright. The authors are responsible for content, researches results and errors.

Annotation. *This article analyzes the concept of innovation, the problems of innovative development of regional economies, the process of innovative development, the structure of innovation, statistics of the innovation process in the Bukhara region.*

Key words: *Innovation, innovation activity, investment, product innovation, technological innovation, marketing innovation, organizational innovation, innovation value.*

Humans are afraid of everything new. To a greater extent, this manifests itself in the transition period, especially in periods of crisis, when there is socio-psychological instability, and the introduction of a new one is perceived as a threat to the existing situation.

According to the latest statistics, large enterprises with more than 1,000 employees are the most active in innovation.

This can be explained by the fact that large enterprises have large financial, industrial, human and political resources - the ability to defend their interests, which largely determines success in the competitive struggle. The experience of foreign companies also shows that innovative development is more favorable for large enterprises and corporations.

Innovative activity is an activity aimed at finding and implementing innovations in order to expand the range and improve product quality, improve technology and organize production.

For the development of the economy and social sphere of the Republic of Uzbekistan in January-March 2021, 35,6 trillion soums of investments in fixed assets were spent from all sources of financing. In dollar terms, they

INNOVATION IN THE MODERN EDUCATION SYSTEM

amounted to 3,4 billion US dollars, and the growth rate in comparable prices to the corresponding period of 2020 was recorded at the level of 96,5%.²⁹

The main condition for the innovative activity of an enterprise is to take into account all morally obsolete, obsolete resources lagging behind the development path, as well as errors, failures and miscalculations. Innovative ideas can come from external and internal sources.

Innovation is the creation or improvement of a product (product, work, service) in a new form, the introduction or improvement of a new form of production process, the introduction of new marketing or organizational methods of doing business, the creation of jobs or the external end result of innovative activity, which includes the establishment relations.

According to our study on the example of the Bukhara region, in 2019, 172 enterprises and organizations independently produced innovative products, works and services. Of these, 168 are small businesses and micro-firms³⁰.

Table 1

Innovative products developed in the Bukhara region

Indicators	2019, %
In 2019, it was mastered for the first time	40,1
Improved in 2017-2019	21,4
Mastered for the first time in 2017-2018.	38,5

Table 2

Innovative products of own production,

INNOVATION IN THE MODERN EDUCATION SYSTEM

volume of works, services (excluding VAT and excise duty) (million soums)

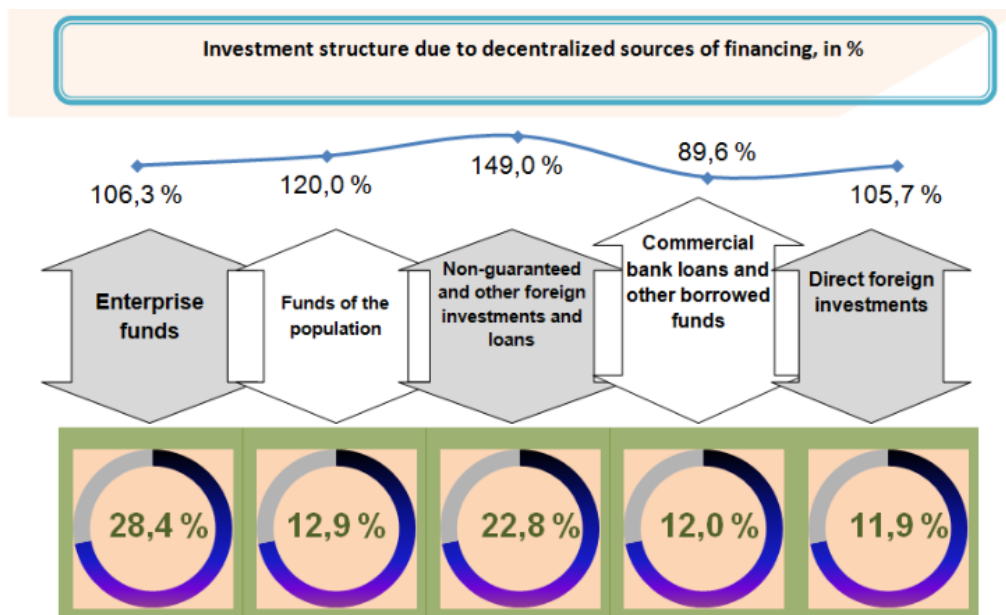

Indicators	2019 y,
In 2019, it was mastered for the first time	67206,9
Improved in 2017-2019	137563,1
Mastered for the first time in 2017-2018.	39439,0

Table 3

Technological, marketing and organizational innovation spending in 2019 by funding source and region

Indicators	2019, %
Organization's own funds	6,3
Foreign investment	85,4
Commercial bank loans	8,3

In January-March 2021, at the expense of the own funds of enterprises and organizations, 10 131,1 billion soums of investments in fixed assets, or 28.4% of their total volume, were disbursed. At the expense of the population, 4 595,5 billion soums of investments were disbursed, or 12,9%. Due to direct foreign investments, 4 243,1 billion soums were spent, which, compared to the same period in 2020, is more by 1,0 percentage points, or 11,9% of their total volume³¹.

³¹ file:///C:/Users/user/Downloads/4.Investments%20and%20construction-2.pdf

According to the statistics of enterprises and organizations that introduced innovations in the Republic of Uzbekistan in 2019, the largest share of innovations by type of economic activity is observed in the manufacturing industry, which is 51,9%.

Turayev Olimjon Suvanovich

Termiz davlat universiteti, Milliy libos va san'at fakulteti, Tasviriy san'at va muhandislik grafikasi kafedrası o'qituvchisi

Annotasiya: *Ushbu maqolamizda tasviriy san'at darslarini yangi pedagogik texnologiyalar asosida tashkil etish mazkur jarayonning nazariy - amaliy kirralarini tadqiq etish, maxsus ishlanmalar yoki tavsiyanomalarning yaratilishini talab etadi.*

Kalit so'zlar: *Pedagogik texnologiya, ta'lim-tarbiya, psixologik xususiyatlari, ehtiyoj, interfaol usullar, axborotli vositalar.*

Tasviriy san'at darslarining maqsadini aniq va puxta belgilanishi yaxlit pedagogik faoliyat muvaffaqiyatini ta'minlashga poydevor yaratadi, tasviriy san'at darslarining maqsadi DTS, o'quv rejasi va dasturi, shuningdek, darslik va ko'llanmalar mazmunida o'z ifodasini topgan ma'lum mavzular hamda o'quv fanining o'ziga xos jihatlari, o'quvchilarning yosh, psixologik xususiyatlari, ehtiyoj, kizihishlari, pedagoglarning bilimi, kasb mahorati, ijodiy layokati pedagogik vaziyatlarni inobatga olish asosida belgilanadi. Ta'lim tizimining barcha bo'g'inlarida "Farzandlarimizni mustaqil fikrli, zamonaviy bilim va kasbhunarni egallagan, mustahkam hayotiy pozitsiyaga ega chinakam vatanparvar insonlar sifatida tarbiyalash biz uchun dolzarb ahamiyatga ega bo'lgan masala hisoblanadi" deb ta'kidlaydi prezidentimiz Sh..Mirziyoyev. Shu bois tasviriy san'at darslarini darslarida o'quvchilarini ma'naviy tarbiyalashda ta'lim-tarbiya tizimiga innovasion, ya'ni ilg'or pedagogik texnologiyalarni tatbiq qilish davr talabi bo'lib kelmoqda. Ana shularni nazarda tutgan holda biz tasviriy san'at darslarini darslari jarayoniga pedagogik texnologiyalarni foydalanish va rejalashtirish hamda ushbu texnologiyalardan foydalangan holda musiqa ta'lim sifatini oshirishga qaratilgan imkoniyatlar to'g'risida fikr yuritimiz. Maqolamizni maqsadi ham o'quvchilarini musiqiy ta'lim sifatlarini oshirish uchun yangi pedagogik texnologiyalardan foydalanishning pedagogik yo'llarini ishlab mashg'ulotlarga joriy etishdir.
